REQUIREMENTS

- A tablet or smartphone
- SilverLake System, CIF 20/20, or Core Director
- iOS, Android, or Windows mobile
- Secure connection
- Wi-Fi
- VPN
- jXchange™

IT WORKS LIKE THIS ...

Branch Anywhere enables your bank to execute an enterprise mobile strategy with a mobile application solution for bank employees. It leverages the time and investment you've already made in your core system and complementary products by extending access to them.

Branch Anywhere uses mobile technology to provide an alternate method for interacting with your processing systems and its integrated retail delivery solutions. It converts tablets and smartphones into new channels that make branch banking a more visual, interactive, and efficient experience.

AGILITY ...

This solution offers new capabilities by giving bank staff members the freedom and flexibility to leave their desks and go to the customer. With alerts, accounts, and customer dashboards available, your employees have all account holder information at their fingertips, including the services they use. Even apart from customer interactions, employees on the go can benefit from taking core system access and all the bank's tools along with them. It's a competitively distinct customer and employee experience.

SEAMLESS INTEGRATION ...

In addition to communication with your bank's SilverLake System®, CIF 20/20®, or Core Director® core system, Branch Anywhere also integrates with 4|sight™, jhaPassPort™, NetTeller®, Synergy Enterprise Content Management™, Synergy eSign™, Synapsys®, jhaEnterprise Workflow™, iPay Solutions™, Yellow Hammer™, and Xperience™; and is powered by jXchange™, Jack Henry Banking's services-oriented .NET platform-based architecture. The Branch Anywhere app can be quickly deployed, efficiently managed with intuitive administrative tools, and seamlessly updated by simply turning features and functions on and off with minimal effort, and the solution's quarterly system maintenance update schedule minimizes maintenance costs and maximizes operating efficiencies.

WHAT IT DOES:

- Enables you to execute an enterprise mobile strategy with a mobile application platform for your employees.
- Enables employees to go to a customer with the relevant information in hand
- Allows employees system access when away from their computers
- Enables quick deployment and efficient management.

WHAT IT DOES FOR YOU:

- Improves branch staff and customer interactions, optimizing the branch experience.
- Positions your bank as a progressive, competitive leader.
- Enhances staff mobility and customer convenience

This solution offers new capabilities by giving bank staff members the freedom and flexibility to leave their desks and go to the customer.
