

## Centurion Emergency Notification™

A Reliable, Automated Incident  
Notification Solution

*Effective, efficient staff communications can dramatically improve your bank's response to and recovery from unexpected business interruptions or catastrophic disasters. Centurion Emergency Notification helps protect personnel, infrastructure, and data by alerting designated members of your staff when emergencies arise.*

## Contact Critical Personnel Quickly When an Emergency Arises

### BUSINESS VALUE

- Reduce Risk

### COMPATIBILITY

- SilverLake System®
- CIF 20/20®
- Core Director®

Centurion Emergency Notification™ helps protect personnel, infrastructure, and data by instantly reaching out to designated members of your staff. Our solution uses the Everbridge Notification platform. Everbridge is one of the world's leading providers of incident notification technology. This system can contact any number of people at any time in virtually any location, using a wide variety of communication devices.

*You can designate any number of groups and group members to receive alerts under user-defined circumstances.*

### IT WORKS LIKE THIS ...

Centurion Emergency Notification is setup and populated with a list of emergency contacts that you provide. Once activated, you can contact the system from virtually any location by computer, telephone, or mobile device to launch a broadcast to your designated personnel. Within minutes, the Centurion Emergency Notification will cycle through up to 27 different contact paths, including SMS text, email, and phone to alert your responders. A near-real-time dashboard will compile and update responses for a complete picture of responder activity.

You can designate any number of groups and group members to receive alerts under user-defined circumstances. Banks can create pre-written messages and scenarios in advance. This allows one-click broadcasting for the most probable emergency situations. In addition to response tracking, this system enables interactive polling to collect data regarding an incident. The system will provide a complete record of your response for post-event analysis.

Centurion Emergency Notification provides "on-the-go" access from a mobile application on smartphones and tablets. Just tap the application on your Apple® iOS, Android™, or BlackBerry® mobile device and get synchronized, near-real-time access to your account. Send messages and review reports, activities, and analytics from any location.

### **RELIABLE PERFORMANCE AND SUPPORT ...**

Centurion Emergency Notification uses geographically dispersed top-tier, carrier-class facilities and infrastructure that guarantee 99.99 percent uptime. Each bank will have a dedicated service account manager and 24-hour live operator support. Users will receive free online training and information regarding best practices for using the alert system. Centurion Emergency Notification is fully compliant with industry security standards.

*Once activated, you can contact the system from virtually any location by computer, telephone, or mobile device to launch a broadcast to your designated personnel.*

## WHAT IT DOES:

- Provides instant notification to key responders in an emergency.
- Enables users to contact the system from virtually any location, including mobile access from a smartphone or tablet.
- Broadcasts messages via SMS text, email, instant message, landline, cell phone, social media, and more.
