Customized Check Printing Solution

Create and print official checks easily, affordably, and securely right at the branch with Check Writer for Core Director. This fully integrated solution saves you time and money and reduces the potential for human error and check fraud.

Looking for a better approach to official check printing?

BUSINESS VALUE

- Make Money
- Improve Operations

COMPATIBILITY

- Core Director®

PRINT ON DEMAND ...

Check Writer for Core Director allows bank personnel to quickly and easily produce and laser print official checks including cashiers checks and money orders. This solution also provides the ability to generate checks for certificates of deposit, IRAs, and loan proceeds. Check Writer for Core Director creates high-quality checks for any department in the bank using the bank's own paper stock and a laser printer. It can even produce checks for a customer's account. These checks are suitable as replacements for starter checks.

USE YOUR OWN LOGO ...

Check Writer for Core Director's compatibility with Microsoft® Word allows tellers to use bank-customized professional quality templates that automatically populate data fields. This feature allows checks to be designed with different fonts, formats, bank logos, signatures, and watermarks.

FLEXIBLE FEATURES ...

Check Writer for Core Director enables banks that elect to print the MICR line to print with MICR toner. Check numbers can be preprinted or Check Writer for Core Director can generate the next available check number. The system provides the bank with the necessary flexibility to set the checking account number for each individual type of check produced.

Check Writer for Core Director automatically tracks each check produced and can print a digitized signature to prevent unauthorized signatures, helping to ensure that tellers follow bank policies concerning authorized signatures. This system also provides a minimum dollar amount for a second signature for each check type. With Check Writer for Core Director, a bank can quickly reconcile issued checks, customize reports for any department, create online check registers, print checks from CSRs' desks for closed accounts, and generate loan proceed checks.

REDUCING RISK, ONE CHECK AT A TIME ...

Check Writer for Core Director helps reduce security risks by deterring check fraud and forgery. It replaces expensive preprinted checks and drastically reduces the time required to manually produce checks. Check Writer for Core Director also improves efficiencies and eliminates voided checks resulting from manual typing errors.

Check Writer for Core Director is another innovative retail delivery solution that enables banks to aggressively and successfully compete, enhance the customer experience, and expand customer relationships at all points of contact.

WHAT IT DOES:

- Allows tellers to quickly and easily produce and laser print official checks including cashiers checks, money orders, and loan proceed checks.
- Prints high-quality checks using the bank's check paper stock on its own laser printer.
- Creates templates in Microsoft Word and populates the templates with data at execution time.
- Provides greater flexibility in designing professional looking checks to allow for different font usage, alignment, bank logos, signatures, and watermarks.
- Allows checks to be printed with MICR toner if the bank elects to print the MICR line.
- Provides the bank with the flexibility to set the checking account number for each individual type of check produced.
- Automatically tracks each check produced and can print a digitized signature to help prevent unauthorized signatures.
- Provides a minimum dollar for a second signature for each check type.
- Allows a bank to quickly reconcile issued checks, generate customized reports for any department, create online check registers, print checks from CSRs' desks for closed accounts, and generate loan proceed checks.
