

jhalD Scan™

## Automated Card Scanning Solution

*If you're still capturing ID information by manually entering data, take a closer look at jhalD Scan. This innovative solution is available with ArgoKeys® Branch Sales Automation™ and automates ID scanning and the associated workflow and enables your bank to save time, improve accuracy, and enhance customer service.*

## An Easier Way to Capture and Store Identification Information

### BUSINESS VALUE

- Improve Operations
- Reduce Risk

### COMPATIBILITY

- SilverLake System®

### IT WORKS LIKE THIS ...

*jhaID Scan* leverages state-of-the-art scanning devices to accurately capture and archive images from a driver's license, military ID, or state ID. The scanned images can then be archived into Synergy Enterprise Content Management™ or other image archives.

### ELIMINATE ERRORS ...

*jhaID Scan* simplifies business processes, automates workflow, and reduces the errors generated in manual processes. By automating the scanning function, *jhaID Scan* eliminates time wasted on manual data entry and helps ensure customer profiles are accurate at the point of entry.

### SCAN WITH EASE ...

*jhaID Scan* offers a simple and intuitive scanning process, capturing both sides of customer ID cards with ease. Contextual information like names and ID numbers are extracted from cards and transferred to ArgoKeys screens. If a card doesn't fill all fields, users can manually edit the necessary information. This versatility enables users to add, delete, and edit the information as necessary.

### RELY ON PROVEN HARDWARE ...

This easy-to-use modular application integrates Card Scanning Solutions (CSSN) idScan® with ArgoKeys, utilizing the flatbed scanners that are supported by the CSSN ScanShell® interface. The scanners are USB and do not require additional external power to operate.

*jhaID Scan* is another innovative solution that generates material operating efficiencies, enhances customer service and convenience, streamlines information entry, and reduces operating costs.

### WHAT IT DOES:

- Automates the capture of ID card images and text.
- Provides easy data extraction.
- Scans a variety of personal ID cards: driver's licenses, military IDs, or state IDs.
- Extracts contextual information such as ID number, first name, and last name from supported cards and uses it to auto-populate in ArgoKeys.
- Allows users to add, delete, or otherwise edit extracted information as necessary.
- Operates through USB and requires no additional external power.

### WHAT IT DOES FOR YOU:

- Increases productivity and improves operational efficiency through additional automation.
- Reduces the likelihood of errors generated by manual processes.
- Eliminates wasted time formerly spent on manual entry of customer information.
- Provides intuitive functionality that is simple for users to learn and operate.
- Enhances customer service quality.
