

## Microsoft® Office 365™

### Cloud-Based Delivery of Microsoft Office

*Microsoft Office 365 opens up a world of possibilities by combining the services of Microsoft Office Professional Plus, Microsoft Exchange Online, Microsoft SharePoint® Online, Microsoft Office Web Apps, and Microsoft Skype® for Business, the next generation instant messaging and collaboration tool. Banks nationwide, regardless of asset size, can now benefit from the same features and functionality that large corporations have enjoyed for years.*

## Could Your Bank Benefit from an Enterprise-Class, Hosted Microsoft Office Suite?

### BUSINESS VALUE

- Improve Operations
- Save Money

### COMPATIBILITY

- SilverLake System®
- CIF 20/20®
- Core Director®

- *Banks nationwide, regardless of asset size, can now benefit from the same features and functionality that large corporations have enjoyed for years.*

### SAVE ON HARDWARE AND LICENSING ...

This solution reduces hardware costs and server administration, because the server-side components of the suite are hosted at a secure SSAE16 and EU-Safe Harbor compliant Microsoft data center, not at a physical bank location. In addition, banks do not pay site license fees for services like Exchange and SharePoint; they pay a per-seat, per-month fee. This makes the service fully scalable for banks of all sizes.

For additional flexibility, banks can choose different service packages for specific employees. The options are:

- Exchange Standard – Includes Exchange, Email, Calendar, Contacts, and Personal Archive
- Exchange Advance – Offers all the above and Unlimited Archiving and Data Loss Prevention
- Enterprise 1 – Provides Exchange, Email, Calendar, Contacts, and Personal Archive, SharePoint Online, Skype for Business, Online Meetings, Desktop Sharing, Microsoft Office Web Apps, View and Edit Word, Excel®, PowerPoint®, and OneNote®.
- Enterprise 3 – Includes all of the above and Microsoft Office Professional Plus.

### SUPPORT AND ASSISTANCE ...

With Microsoft Office 365 from Jack Henry Banking, banks get the same great Microsoft Office products that they use today, and they also receive a professional migration and implementation experience, and ongoing live support. Jack Henry Banking is intimately familiar with the banking industry and can provide the high-level, personalized support banks are accustomed to.

### TAKE A LEAP FORWARD IN PRODUCTIVITY AND APPLICATION POWER ...

Microsoft Office 365 enables banks to enhance efficiencies and provide superior response to their customers through powerful communications options such as:

- SharePoint Online – An intranet for quick access to documents, instructions, and resources.
- Skype for Business (formerly called Lync) – Instant messaging, online conferencing, and the sharing of screens, audio, video, or a virtual whiteboard.
- Exchange Online – Employee calendars, email, and contacts available and synchronized on desktop, phone, or tablet.
- Enterprise Mobility Management – Control all your iPhones and Android devices from a webpage, including email management, synchronization and remote controls.
- Office Web Apps – Collaborative viewing and editing of shared Office documents.
- Office Professional Plus – A full-featured, always up-to-date version of Microsoft Office on the desktop.

By moving the office to the cloud, banks can find the familiar, reliable Microsoft applications they're accustomed to with the added benefit of powerful collaboration tools and offsite hosting.

A Bundle for Every FI Need	Exchange Standard	Exchange Advanced	Enterprise 1	Enterprise 3

Note: Jack Henry Banking can also work with you to build a hybrid customer solution to meet your unique needs.

**WHAT IT DOES:**

- Hosts all server-side components at a Microsoft data center.
- Provides live support from experienced Jack Henry Banking technicians.
- Offers an up-to-date, enterprise-class Microsoft Office suite on the desktop.
- Provides an intranet for internal document and resource organization.
- Enables messaging, conferencing, and presentations between employees.
- Enables collaborative sharing and editing of Office documents.
- Makes email, calendar, and contacts available and synchronized on multiple devices.

**WHAT IT DOES FOR YOU:**

- Reduces IT costs because cloud-based services are hosted by Microsoft, not in-house at banks.
- Replaces licensing costs with per seat, per month fees.
- Provides different package options for specific employees.
- Provides collaboration and communication between employees.
- Offers multiple tools and services for organizing and presenting information.

*Microsoft Office 365 is another innovative professional service that enables banks to operate more efficiently and maximize the return on their technology investments.*
