

## OnTarget™ Deposit Platform

Comprehensive sales, service, and  
transaction posting

*Automate transaction platform functions to make your branches  
more cost-effective and efficient delivery channels with OnTarget  
Deposit Platform, a Jack Henry Banking® and ARGO Data  
Resources Corporation deposit platform.*

## Automate transaction platform functions.

### BUSINESS VALUE

- Improve Operations

### COMPATIBILITY

- Core Director®

#### IT WORKS LIKE THIS ...

OnTarget Deposit Platform improves productivity, allows for greater use of sales aids, and enhances service quality. This solution provides functionality for CIF integration, new account openings, sales tools for product presentations, product comparison cross selling, and "what if" needs analyses; and includes core functionality for creating new CIF records, new account data entry, customer inquiry, automated electronic forms, account forms maintenance, and near-real time host connectivity and upload.

#### SEAMLESS INTEGRATION ...

OnTarget Deposit Platform provides direct integration to other Jack Henry Banking complementary products to streamline related processes. This includes the means to directly launch into Yellow Hammer BSA™, review document images from Synergy Enterprise Content Management™ (ECM), and utilize electronic signatures through Synergy eSign™. Other integration tools are available for third-party applications, including customer verification through FIS Qualifile and Deluxe Detect, and Check Order through Deluxe Order Pro, Harland Check Order, or Main Street Checks.

#### INTUITIVE DESIGN ...

The application's intuitive design allows users to become proficient faster by providing simple navigation and eliminating code memorization. Additionally, the enhanced design reduces errors by propagating data when possible and by providing edit checks for data entry validation, helping to enforce bank policies at the desktop. Overall, this process translates into improved operating efficiency, while at the same time increasing sales and revenue.

#### WHAT IT DOES:

- Empowers community banks to successfully compete with money centers and national banks.
- Automates transaction platform functions to make the branch a more cost-effective and efficient delivery channel.
- Provides functionality for CIF integration, new account openings, sales tools for product presentations, product comparison cross selling, and "what if" needs analyses.
- Includes core functionality for creating new CIF records, new account data entry, customer inquiry, automated electronic forms, account forms maintenance, and near-real time host connectivity and upload.
- Reduces errors by propagating data when possible and providing edit checks for data entry validation.

- Enforces bank policies through system and field level controls.
- Integrates with other Jack Henry Banking complementary products, including Yellow Hammer BSA, Synergy ECM, and Synergy eSign.

#### WHAT IT DOES FOR ME:

- Improves productivity, allows for greater use of sales aids and enhances service quality.
- Allows users to become proficient faster by providing simple navigation and eliminating code memorization.
- Improves operating efficiency, while at the same time increasing sales and revenue

*OnTarget Deposit Platform enables community banks to successfully compete with money centers and national banks by offering comparable, high-demand retail products and services.*
