

## Synergy API Integration Toolkit™

### Internet-Based Integration

*The Synergy API Integration Toolkit is a flexible, easy-to-use system that enables your bank to quickly access Synergy data and integrate that data with existing applications. This module of the Synergy Enterprise Content Management (ECM) solution also allows banks to tailor customers' online access to bank-specified documents, including historical account statements, notices, and check images.*

## Is Your Content Easily Accessible for You and Your Customers?

### BUSINESS VALUE

- Save Money
- Improve Operations

### COMPATIBILITY

- SilverLake System®
- CIF 20/20®
- Core Director®

### IT WORKS LIKE THIS ...

Synergy API Integration Toolkit leverages open architecture and industry-leading integration tools to enable existing key applications, such as teller platforms, Internet services, and third-party databases, to seamlessly access the reports, documents, and check images stored in Synergy.

### EMPOWER YOUR CUSTOMERS WITH THE DATA THEY WANT ...

This parameter-driven module of Synergy enables banks to expand their Internet services by providing customers with online access to Synergy content including account statements, notices, and check images. This module empowers banks to control what content is available for Internet access, and operates independently of "click charges" for viewing customer data.

### IT'S INTEGRATED, ADAPTABLE, AND TRACKABLE ...

Synergy API Integration Toolkit offers full integration with Jack Henry Banking's core processing, teller, check imaging, and Internet banking solutions and it allows for easy integration with third-party solutions through a standard API or .NET Web service interface. This solution can also be used to integrate Synergy information into desktop client applications. Synergy API Integration Toolkit provides the ability to convert Synergy content into standard PDFs and Synergy images into standard JPEG format for external use. And for tracking purposes, this solution provides audit trails of activities being performed through the API.

### WHAT IT DOES:

- Expands existing Web-based capabilities to include online access to Synergy content including documents, account statements, notices, and check images.
- Enhances existing desktop capabilities to include access to Synergy content including documents, account statements, notices, and check images.
- Provides companies with complete control over what Synergy content is available for Internet access.
- Provides audit trails of activities being performed through the API.
- Offers full integration with Jack Henry Banking's core processing, teller, check imaging, and Internet banking solutions.
- Allows for easy integration of third-party solutions through a standard API or .NET Web service interface.
- Provides the ability to convert Synergy content into a standard PDF format for external use.
- Offers the ability to convert Synergy images into a standard JPEG format for external use.

### WHAT IT DOES FOR YOU:

- Enables banks to expand their high-demand Internet banking services.
- Enhances customer service, convenience, and retention.
- Streamlines operations by enabling existing applications, such as teller platforms, Internet services, and third-party databases, to seamlessly access reports, documents, and check images stored in Synergy.

*Synergy API Integration Toolkit is another innovative enterprise content management solution that generates material operating efficiencies, expedites research, enhances customer service and convenience, streamlines information access and distribution, and reduces operating costs.*
