

## Synergy Kofax Capture™

### Automated Information Capture From Documents and Forms

*Convert your paper documents into reusable electronic business information seamlessly with Synergy Kofax Capture. This module of the Synergy Enterprise Management (ECM) solution combines ease-of-use with leading-edge document capture technology, providing the advanced functionality you can consistently expect from Jack Henry Banking.*

## Drive Productivity with Effortless Electronic Document Capture

### BUSINESS VALUE

- Save Money
- Improve Operations

### COMPATIBILITY

- SilverLake System®
- CIF 20/20®
- Core Director®

### IT WORKS LIKE THIS ...

Synergy Kofax Capture reduces operating costs and expedites business procedures by automating the document capture and recognition process. This innovative solution converts information from paper to reusable, electronic business documents, allowing secure storage and effortless retrieval of information. Synergy Kofax Capture reduces costs by decreasing the labor associated with manually classifying and indexing important documents and forms. This system can also be configured to present exceptions, which significantly streamlines operations and increases efficiency and accuracy.

### INTEGRATES SEAMLESSLY ...

Kofax is a leading provider of document capture application software that enables documents to be converted into reusable electronic business information. The advanced functionality of the Synergy platform is integrated with Kofax to further automate the time-consuming, error-prone manual document scanning process. Kofax Ascent Capture automates the capture process via its scan, recognition, and validation features, conveniently filing information within Synergy.

*This innovative solution converts information from paper to reusable, electronic business documents, allowing secure storage and effortless retrieval.*

### MAINTAINS SPEED DESPITE LOCATION ...

Synergy Kofax Capture's distributed capture capabilities bring a full breadth of functionality to remote sites and branches regardless of network connection speed. The advanced technology provided with Synergy Kofax Capture substantially improves day-to-day operations and satisfies ongoing document management needs.

### **DELIVERS PRECISE MEASUREMENT AND IDENTIFICATION ...**

Synergy Kofax Capture boasts a highly-sensitive recognition feature that identifies text, numbers, icons, and other images contained in a document. This recognition feature is among the most sophisticated in the industry and its high-end processing and extraction mechanisms offer best-of-breed form recognition and template processing of structured, semi-structured, or unstructured forms. This solution also reduces manual intervention by automating the indexing/filing process.

### **OPTIONAL ADD-ON APPLICATIONS ...**

Synergy Kofax Transformation Modules® (KTM) is a suite of add-on applications for Kofax Capture that streamline the transformation of documents into structured electronic information, ready for delivery into business processes. It replaces manual, error-prone, and expensive document sorting and data entry processes with automatic document classification, separation, and data extraction. Kofax KTM for invoices, in combination with Kofax Capture, provides accounts payable departments with the ability to capture paper or electronic invoices at remote and central sites, extract all the necessary information automatically, and match it to purchase order data. This enables automatic booking of invoices in the leading enterprise resource planning (ERP) systems and image storage in Synergy ECM.

### **COMPLIANCE-DRIVEN ...**

Coupled with Synergy's storage capabilities, Synergy Kofax Capture assists banks' compliance with records management regulations. This solution's sophisticated search capabilities enable banks to simplify business processes by making documents easily accessible. Synergy Kofax Capture also offers sophisticated user tracking capabilities and the ability to generate turnkey reports.

**WHAT IT DOES:**

- Automates the advanced capture, classification, and recognition of documents and forms.
- Leverages flexible architecture that supports central capture or distributed remote capture.
- Automates the delivery of properly classified and indexed documents and data into Synergy.
- Provides turnkey report generation capabilities.
- Offers sophisticated user tracking capabilities.
- Provides the ability to capture faxes and emails.
- Identifies and presents exceptions.
- Brings a full breadth of functionality to remote sites and branches regardless of network connection speed.
- Streamlines the transformation of documents into structured electronic information with the optional Synergy KTM modules.

**WHAT IT DOES FOR YOU:**

- Provides scalable options that grow with banks' unique needs.
- Increases efficiency and data accuracy by eliminating manual data entry.
- Accelerates capture process and minimizes processing time.
- Reduces ongoing labor costs.
- Offers easy installation and user-friendly functionality.

*Synergy Kofax Capture is another innovative ECM solution that generates material operating efficiencies, expedites research, enhances customer service and convenience, streamlines information access and distribution, and reduces operating costs.*
