

## Synergy PowerSearch™

### Natural Language Search and Retrieval

*Synergy PowerSearch empowers users to search report data, scanned images, electronic documents, and check images using free form, natural language. This contemporary module of the Synergy Enterprise Content Management (ECM) solution provides the ability to quickly and easily locate content stored in the various modules of Synergy or in local or network directories – a feature that is unmatched by competitive solutions.*

## Find Exactly What You are Looking For

### BUSINESS VALUE

- Save Money
- Improve Operations

### COMPATIBILITY

- SilverLake System®
- CIF 20/20®
- Core Director®

#### IT WORKS LIKE THIS ...

This sophisticated solution performs exact content searches or natural language searches that locate document content containing the desired words, keywords, phrases, sentences, paragraphs, or variations without using Boolean operators, index values, or complex queries.

#### COMPREHENSIVE SEARCH CAPABILITIES ...

Synergy PowerSearch is not limited to searching Synergy alone. This solution searches documents and files located in accessible local or network directories outside of the Synergy system as well.

#### SAVE TIME AND GENERATE FEWER ERRORS ...

Synergy PowerSearch improves operating efficiencies and productivity by eliminating the time-consuming input of keyword (index) information, and enhances customer service and responsiveness by materially reducing the time required to conduct ongoing research. This solution compensates for inevitable human error such as misspellings and typos, and can easily discern poor quality type on reports or other document images. This intuitive solution shows exact matches as well as similar matches, and provides a confidence level for each search item found. Additionally, Synergy PowerSearch reduces business risks by quickly and accurately finding compliance-related items.

#### WHAT IT DOES:

- Provides fast and accurate search capabilities of all stored report data, scanned images, electronic documents, and check images.
- Performs exact searches or content-based searches that locate documents containing variations of the words used in natural language searches.
- Searches documents and files located in accessible local or network directories outside of the Synergy system.
- Locates target documents and the desired content within those documents.
- Compensates for human errors such as misspellings and typos.
- Shows exact matches as well as similar matches.
- Provides a confidence level for each search item found.

#### WHAT IT DOES FOR YOU:

- Enhances customer service and responsiveness by materially reducing the time required to conduct ongoing research.
- Improves productivity by eliminating the time consuming input of keyword (index) information.
- Enhances operating efficiencies by enabling better customer service.
- Reduces operating costs by generating material operational efficiencies.
- Reduces business risks by quickly and accurately finding items needed to show compliance.

*Synergy PowerSearch is another innovative enterprise content management solution that generates material operating efficiencies, expedites research, enhances customer service and convenience, streamlines information access and distribution, and reduces operating costs.*
